Code:	<b>COMPUTER SECURITY (English)</b>		
General Overview:: Professional studies of criminal investigation			
Number of hours: 45 Lectures: 20 Exercises:10 Seminars:15		ECTS: 6	Semester: II
Course Status: <input checked="" type="checkbox"/> compulsory <input type="checkbox"/> elective			
Course Leader: Krunoslav Antoliš, PhD			
Co-instructors:			
Course Outline:			
<p>Basic notions and definitions of computer security. Theory of complexity and NP-completeness, compatibility and modular arithmetic, inversion computing. Cryptographic methods and working methods. The challenge of perfect security and computing systems with public and private key. Concept and development of electronic signature, historical development of Public Key Infrastructure. Studying of confidentiality, credibility, integrity, irrevocability, analysis of advantages and disadvantages of value judgements and effects. Development and policy of PKI system management. Approach to cryptanalysis through analysis and design of knowledge, system integration and implementation of presumption with new functionality added. Security and privacy features on www. Terrorism and global trends, especially cyber terrorism as a real threat to computer systems.</p>			
Course Objectives:			
<p>The course objective is to study a systematic approach to computer security. The major objectives are acquiring the knowledge in computer systems protection not only from the point of view of individual computers but also from the point of view of computer networks like intranet, extranet or Internet. The students shall be presented the legal and normative aspects of security referring to computer work and computer networks. The results can be achieved by means of an analysis of theoretical and practical issues, of causes and possible danger as well as of the protection modalities against viruses, worms, Trojan horse including the newest types of so-called cyber terrorism.</p>

CRIMINAL LAW PROTECTION OF MINORS (English)	45	3
RISK MANAGEMENT	30	3

Code:	<b>RESEARCH METHODOLOGY FOR SAFETY PHENOMENA</b>		
Opći podaci			
Number of hours: 60 Lectures.: 30 Exercises: 30 Seminars:	ECTS: 8	Semester: III	
Course Status: <input checked="" type="checkbox"/> compulsory <input type="checkbox"/> elective			
Course Leader: Assist. Prof. Joško Vukosav			
Co-instructors: . Joško Sindik, PhD			
Course Outline:			
<p>Defining the topic. Science and methods in science. Differentiation between scientific and non-scientific methods. Measurement. Types of researches. Research ethics. Steps in research. Basic research designs and choosing the appropriate method for data analysis. Hypothesis development. Methods of data collection. Interpretation of results. Shortcomings of a particular research type and design.</p>			
Course Objectives:			
<p>Knowledge of basic scientific methods necessary for applied researches. Students will be able to critically evaluate a simple designed research in criminalistics and criminology. Systematic, critical and empirical approach to examination of phenomena in criminalistics and criminology. Development of interest for improving of evidentiary sheets, analysis and research implementation in services dealing with safety phenomena.</p> <p>Students will get the overview of conducting scientific research, with the emphasis on examples and evaluation of criminal and criminological investigations. Students will learn basic research methodology (simple qualitative and quantitative methods) appropriate for scientific research for criminal investigation and criminology.</p>			
Teaching Methods:			
<input checked="" type="checkbox"/> lectures	<input checked="" type="checkbox"/> exercises/seminars	<input checked="" type="checkbox"/> individual tasks	<input checked="" type="checkbox"/> multimedia
<input type="checkbox"/> internet	<input type="checkbox"/> laboratory	<input type="checkbox"/> demonstrations	<input checked="" type="checkbox"/> tutorials
<input type="checkbox"/> field classes			
Assessment:	<input checked="" type="checkbox"/> oral exam <input checked="" type="checkbox"/> written exam <input checked="" type="checkbox"/> preliminary exam		
Prerequisites:	Basics of statistical analysis for investigators
